REPORT TO CONGRESS ON THE STATUS OF THE HARBOR MAINTENANCE TRUST FUND FOR FISCAL YEARS 2005 AND 2006

EXECUTIVE SUMMARY

The Harbor Maintenance Tax (HMT) and Harbor Maintenance Trust Fund (HMTF) were established by Title XIV of the Water Resources Development Act (WRDA) of 1986 (P.L. 99-662). The HMT is applied as a 0.125 percent ad valorem fee on the value of commercial cargo loaded or unloaded on vessels using Federally maintained harbor projects. HMT revenues collected by U.S. Customs and Border Protection (CBP) are transferred to the HMTF and subsequently transferred to the General Treasury in accordance with Congressional appropriations. The HMTF is authorized to be used to recover up to 100 percent of the U.S. Army Corps of Engineers (Corps) eligible Operation and Maintenance (O&M) expenditures for commercial navigation in harbors and channels, but not fuel taxed inland waterways, along with 100 percent of the O&M cost of the St. Lawrence Seaway by the St. Lawrence Seaway Development Corporation (SLSDC), certain costs of the National Oceanic and Atmospheric Administration (NOAA), and the costs to administer the HMTF. The Federal share for construction of Dredged Material Disposal Facilities (DMDFs) necessary for Federal harbor and channel O&M, for operation and maintenance of DMDF's, including beneficial use, for the mitigation of the impacts of Federal navigation O&M on nearby shores, and for the dredging of contaminated sediments in or affecting Federal navigation harbors and channels also are eligible for recovery from the HMTF in accordance with Section 201 of the Water Resources Development Act of 1996 (P.L. 104–303).

The U.S. Supreme Court's March 31, 1998, ruling on U.S. Shoe Corp. v. The United States found that the HMT violated the export clause of the Constitution. As a result of the Supreme Court's decision, the U.S. Customs Service halted HMT collections on U.S. exports in Fiscal Year (FY) 1998. Exports comprised about 30 percent of the HMT collections before this decision was rendered. The U.S. Shoe decision struck down the HMT as it applied to exports, but the U.S. Government is statutorily required to continue collecting the HMT from other cargo and passenger categories. Therefore, collection of the HMT on these other categories continued in FYs 2005 and 2006.

Federally maintained navigation harbors and channels and associated facilities are vital to the waterborne transportation of American trade goods and essential to U.S. economic competitiveness within the global marketplace. In 2005, U.S. waterborne commerce totaled 2.527 billion short tons, a decrease of 0.9 percent from 2004 total tonnage figures. Of this amount, foreign waterborne commerce (imports and exports) totaled 1.499 billion tons, valued at \$1.116 trillion, a decrease of 0.4 percent from 2004 foreign waterborne tonnage and a decrease of 2.7 percent in value. The 2005 value of foreign waterborne commerce is equivalent to approximately 9 percent of U.S. Gross Domestic Product. Domestic waterborne commerce in 2005 totaled 1.029 billion tons, a decrease of 1.7 percent from 2004 domestic waterborne tonnage.

The maintenance of navigable harbors and channels is the primary O&M activity for which Corps expenditures are recovered from the HMTF. In FY 2005 Corps O&M expenditures for harbors and channels totaled \$708.6 million and in FY 2006 they totaled \$696.8 million. Included in the harbor O&M costs are projects financed from the Operation and Maintenance, General, account for mitigation

of shore damage due to Federal navigation projects and O&M dredging of contaminated sediments. The Federal share of construction of DMDFs necessary for Federal harbor and channel O&M, which has been recovered from the Construction, General, account since FY 1999, was \$7.8 million in FY 2005 and \$8.3 million in FY 2006. Total O&M expenditures plus Construction expenditures for the construction of DMDFs equaled \$716.4 million in FY 2005 and \$705.1 million in FY 2006.

In FY 2006 HMTF revenues (HMT receipts plus accrued interest) totaled \$1,320.9 million, an increase of \$198.3 million (17.7 percent) over FY 2005 revenues (see Table ES-1). In FY 2006 transfers from the HMTF totaled \$798.1 million, an increase of \$92.1 million (13 percent) over FY 2005 transfers of \$706 million.

In FY 2006 the ending balance of the HMTF was \$3.306 billion, an increase of \$523 million (18.8 percent) over the FY 2005 ending balance of \$2.783 billion. The ending balance of the HMTF is projected to increase to approximately \$3.947 billion in FY 2007, an increase of \$641 million (17.8 percent) versus FY 2006, and to \$4.728 billion in FY 2008. Revenues substantially exceeded transfers in FY 2005 and 2006 as they have for a number of years. With no change in the conditions affecting revenues or transfers, the balance in the HMTF is projected to grow and continue to be sufficient to meet future demands.

Table ES-1 Summary of Recent HMTF Operations, Actual (FY 2003 - 2006) and Projected (FY 2007 - 2008) (thousands of dollars)

	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008
Beginning Balance	1,873,414	2,092,077	2,366,260	2,782,934	3,305,746	3,947,000
Revenues (HMT & Accrued Interest)	804,518	922,383	1,122,630	1,320,933	1,439,000	1,580,000
Total Available	2,677,932	3,014,460	3,488,890	4,103,867	4,744,746	5,526,746
Transfers (Expenditures)	585,855	648,200	705,956	798,121	798,000	799,000
Ending Balance	2,092,077	2,366,260	2,782,934	3,305,746	3,946,746	4,727,746

REPORT TO CONGRESS ON THE STATUS OF THE HARBOR MAINTENANCE TRUST FUND FOR FISCAL YEARS 2005 AND 2006

I. BACKGROUND

- 1. **Authority.** This report on the status of the Harbor Maintenance Tax (HMT) and Harbor Maintenance Trust Fund (HMTF) is provided in accordance with Section 330 of the Water Resources Development Act (WRDA) of 1992 (P.L. 102-580). The report covers the financial condition and results of operations of the trust fund for Fiscal Years 2005 and 2006 and its expected condition and operations over the next five years (Fiscal Years 2007–11).
- 2. **History of HMT and HMTF.** The HMT and HMTF were established by Title XIV of the Water Resources Development Act (WRDA) of 1986 (P.L. 99-662). The HMT is applied on an ad valorem basis on the value of commercial cargo involved in "any port use" of Federally maintained harbor projects. The term "port use" is defined in Section 1402 of WRDA 1986 [26 USC 4462] as the loading or unloading of commercial cargo to or from a commercial vessel at a port. "Port" is defined as any harbor or channel (or component thereof) in the United States which: (a) is not a fuel taxed inland waterway and (b) is open to public navigation. The list of ports subject to the HMT is defined and administered by the U.S. Customs and Border Protection (CBP) within the Department of Homeland Security, which was established on March 1, 2003. Before that date the U.S. Customs Service was within the Department of the Treasury. The U.S. Customs Service made an administrative decision before implementation of the HMT to generally exclude shallow draft ports and harbors from the list of ports where the HMT is applied, unless they are part of deep draft port and harbor complexes. The "commercial cargo" subject to the fee is defined as any cargo transported on a commercial vessel, including passengers transported for compensation or hire, but not including bunker fuel, ship's stores, sea stores, the legitimate equipment necessary for the operation of a vessel, nor any fish or other aquatic animal life caught and not previously landed on shore.
- 3. **HMT Rate.** Section 1402 of WRDA 1986 [26 USC 4461] originally established an *ad valorem* rate of 0.04 percent of the value of the cargo subject to the tax. The revenue generated from this 0.04 percent tax rate was intended to be sufficient to recover not more than 40 percent of eligible U.S. Army Corps of Engineers (Corps) Operation and Maintenance (O&M) costs assigned to commercial navigation, and 100 percent of the St. Lawrence Seaway Development Corporation's (SLSDC) eligible O&M costs for the St. Lawrence Seaway. However, Section 11214 of the Omnibus Budget Reconciliation Act of 1990 (P.L. 101-508) subsequently increased the HMT from 0.04 to 0.125 percent, effective January 1, 1991, in conjunction with an authorized increase in the recovery level of the Corps O&M expenditures on behalf of commercial navigation up to 100 percent in accordance with Section 316 of WRDA 1990 (P.L. 101-640).
- 4. **Exclusions.** WRDA 1986 also set forth a number of exclusions from the above definitions. For the purposes of the Act, ferries are not considered as commercial vessels; no tax is imposed on cargo moving to and from Alaska, Hawaii, and other U.S. possessions (except for Alaskan crude oil, which is subject to the HMT); and the *ad valorem* tax is not imposed on any cargo associated with vessel movements to or from and on the fuel taxed inland waterways system. Thus, although there are certain

exceptions, the tax is generally imposed against most imports, foreign trade zone cargo, and passengers not aboard ferries and about 40 percent of domestic shipments.

- 5. **Eligible Expenditures.** Funds collected by CBP pursuant to the Act are transferred to the HMTF for recovery of eligible expenditures in accordance with Congressional appropriations. Funds are transferred from the HMTF to the General Treasury for current year expenditures based on estimates prepared monthly. The Act, as amended, authorizes eligible Corps and SLSDC O&M expenditures to be recovered from the HMTF, as outlined below.
- 6. Uses of HMTF. Section 210 of WRDA 1986 specifically authorized appropriations out of the HMTF for 100 percent of the "eligible operations and maintenance costs of those portions of the St. Lawrence Seaway operated and maintained by the St. Lawrence Seaway Development Corporation," and "not more than 40 percent" [amended under Section 316 of WRDA 1990 to 100 percent] "of the eligible operations and maintenance costs assigned to commercial navigation of all harbors and inland harbors within the United States." Section 201 of WRDA 1996 (P.L. 104-303) authorized the HMTF to be used to recover the Federal share of construction costs for Dredged Material Disposal Facilities (DMDFs) associated with the O&M of Federal commercial navigation projects, including beneficial uses, the dredging and disposal of contaminated sediments that are in or affect the maintenance of Federal channels, the mitigation of O&M impacts from Federal navigation, and the O&M of DMDFs.
- 7. U.S. Army Corps of Engineers. The Corps interprets the term "commercial navigation" referenced in Section 210 to mean any project authorized by Congress with commercial navigation as an authorized purpose. Most Federal deep and shallow draft harbor projects are "single-purpose" commercial navigation projects. All O&M and the Federal share of dredged material disposal area construction costs for such "single-purpose" navigation projects are subject to recovery from the HMTF. There are also some projects with a commercial navigation purpose that have other authorized purposes as well. Such purposes may include flood control, hydropower, recreation, water supply, environment, and other allied water resources uses. For "multi-purpose" projects, only expenditures on behalf of commercial navigation and joint-use costs allocated to commercial navigation are subject to recovery from the trust fund. Expenditures for other specific and joint use purposes, such as hydropower, are not eligible for HMTF monies.
- 8. **St. Lawrence Seaway Development Corporation.** Section 210 of WRDA 1986 authorized funding 100 percent of the O&M expenditures for the St. Lawrence Seaway Development Corporation (SLSDC) from the HMTF. In prior years, funds were transferred to the Department of Transportation as payments for SLSDC rents. These rent payments are now included in the total SLSDC transfers and amounted to \$15,706,800 in FY 2005 and \$16,121,160 in FY 2006.
- 9. **St. Lawrence Seaway Tolls.** Prior to FY 1995 the tolls collected on that portion of the St. Lawrence Seaway under United States jurisdiction were deposited into the HMTF, but then fully rebated back to the vessel operating companies paying the tolls in accordance with Section 805 of WRDA 1986. However, with the passage of Section 339 of the Department of Transportation and Related Agencies Appropriations Act for Fiscal Year 1995 (P.L. 103-331), the collection of tolls on the U.S. portion of the Seaway was eliminated, effective October 1, 1994. Approximately \$9.55 million in Seaway tolls were rebated back to the vessel operating companies during FY 1994, the last full year of toll collections on the U.S. portion of the Seaway. Toll rebates from the HMTF averaged about \$9.5 million per year from FY 1988 1994.

- 10. National Oceanic and Atmospheric Administration. The original legislative proposal for the Water Resources Development Act of 1990 (P.L. 101-640) included several amendments to the Harbor Maintenance Trust Fund. These included increasing the *ad valorem* fee from 0.04 percent to 0.125 percent, increasing the recovery level for the Corps of Engineers from 40 percent to 100 percent, providing fiunds for the National Oceanic and Atmospheric Administration's (NOAA) marine navigation services, and providing for reimbursement of administrative costs. However, Congress did not pass all of the proposed amendments. Section 316 of the Water Resources Development Act of 1990 authorized the increase in the recovery level for the Corps to 100 percent while the Omnibus Budget Reconciliation Act of 1990 (P.L. 101-508) increased the *ad valorem* fee to 0.125 percent, beginning January 1991. Hence, NOAA never received authorization to recover costs from the Harbor Maintenance Trust Fund.
- 11. **Department of Homeland Security.** During the 103rd Congress legislation was enacted which allows the CBP, the Corps, and the U.S. Department of Commerce to share a maximum total of \$5 million per year for expenses incurred in the administration of the HMT. Under Section 683 of the North American Free Trade Agreement Implementation Act (P.L. 103-182) [107 Stat. 2057], funds were to be made available as of the beginning of FY 1995; however, enactment was too late to include monies in the FY 1995 appropriations. Since FY 1996, \$3 million has been transferred annually to the CBP for administration of the HMT. In addition, \$608,000 was made available to the Corps in FY 2005 and \$541,000 in FY 2006 to collect and validate domestic and foreign shipper information required for auditing HMT collections, tracking O&M expenditures, preparing the annual HMTF report to Congress, and to coordinate with the CBP on data collection and enforcement issues.
- 12. **Challenges to HMT.** On October 25, 1995, the U.S. Court of International Trade (CIT) issued a summary judgment in the case *United States Shoe Corp. v. The United States*, 907 F. Supp. 408, finding the HMT unconstitutional under the export clause of the Constitution. Article I, Section 9, Clause 5 provides that "No Tax or Duty shall be laid on Articles exported from any State." The CIT also enjoined the Customs Service from collecting the fee. However, in response to a motion filed by the U. S. Department of Justice, the CIT agreed to let the Customs Service continue to collect the fee until the conclusion of any appellate proceedings.
- 13. **Supreme Court Decision.** On June 3, 1997, the U.S. Court of Appeals for the Federal Circuit affirmed the CIT's ruling in a 4-to-1 decision (114 F. 3d 1564), and on March 31, 1998 that decision was affirmed by the U.S. Supreme Court, U.S. v. U.S. Shoe Corp., 523 U.S. 360. In its unanimous decision the Supreme Court confirmed that levying a tax on the value of commercial cargo loaded for export violated the export clause of the Constitution. The U.S. Shoe decision affects only exports, which represented approximately 30 percent of HMTF revenues during FYs 1996 and 1997. The export clause does not, however, prohibit a user fee, provided the fee lacks the attributes of a generally applicable tax or duty and is, instead, a charge designed as compensation for Government supplied services.
- 14. **Discontinuation of Collections on Exports.** As a result of the Supreme Court ruling, the Customs Service published a notice in the Federal Register advising exporters that they should stop paying the HMT effective April 25, 1998. The HMT is no longer being collected on exported goods. Under existing law the CBP continues to collect the HMT on imports, domestic shipments, foreign trade zone cargo, and passengers.
- 15. **Refunds.** HMT collections for exports received during the judgment period totaled \$1.08 billion, according to the CBP, Accounting Services Division. HMT refunds from Department of the Treasury

Fund 20X1807 "Refund of Monies Erroneously Received and Covered (Indefinite)" are available to claimants. They must follow CIT procedures requiring the filing of a claim by the claimant and review and approval by the Court. Refunds issued during FY 2005 totaled \$12.9 million, but refunds issued during FY 2006 fell to \$956,000. Amounts collected during the judgment period and still available for refund, subject to the receipt of a valid claim approved by the Court, totaled \$3.0 million as of September 2006.

16. Other HMT Challenges. In a separate ruling, Carnival Cruise Lines, Inc., v. United States, 929 F. Supp. 1570 (Ct. Int'l. Trade, 1996), the CIT ruled that the statutory provision exacting revenue from exports was severable from the remainder of the law, and that the invalidity of this provision would not apply to traffic other than exports (i.e., import, domestic, and foreign trade zone cargo, and passengers). Subsequent court decisions have established that the HMT is constitutional as applied to interstate shipments (Florida Sugar Marketing and Terminal Association v. United States, 40 F. Supp. 2d 479 (Ct. Int'l. Trade 1999)), cert. denied, 531 U.S. 1191 (2001), imports and domestic unloadings ((Thomson Multimedia Inc. v. United States, 340 F.3d 1355 (Fed. Cir. 2003), cert. denied, 541 U.S. 1040 (2004)), and cruise line passengers (Carnival Cruise Lines v. United States, 200 F.3d 1361 (Fed. Cir. 2000)), regardless of whether or not cruise origination or termination points were HMT-exempt ports (Princess Cruises v. United States, 201 F.3d 1352 (Fed. Cir. 2000)), cert. denied, 530 U.S. 1274 (2000). Regarding cruise line passengers, courts have held that the HMT could not be applied retroactively to layover-only stops prior to 1993, when the Customs Service initially determined that the HMT applied to such stops (Princess Cruises v. United States, 217 F. Supp. 2d (Ct. Int'l Trade 2002), aff'd 397 F.3d 1358, 1370 (Fed Cir. 2005); Carnival Cruise Lines, Inc. v. United States, 246 F. Supp. 2d 1296 (Ct. Int'l Trade 2002), aff'd 404 F.3d 1312 (Fed. Cir. 2005)). However, in an unpublished decision in Nippon Express v. United States, Slip. Op. No 04-136 (Ct. Int'l Trade, Nov. 4, 2004), the CIT held that for the purposes of the Harmonized Tariff Schedule of the United States (HTSUS), the HMT is an "internal revenue tax" that qualifies for an exemption for imports of foreign military articles under the HTSUS, Ch. 98, U.S. Note 3, with the result that the HMT could not be assessed against the duty-free military equipment in question.

In July 2005, in view of the administrative claims procedures established by the Government to process HMT refunds, the CIT ordered the dismissal of all HMT actions pending on the CIT docket after December 1, 2005. *United States Shoe Corp. v. United States, Slip Op. No 05-89 (Ct. Int'l Trade, July 27, 2005); see also West Travel, Inc. v. United States, Slip Op. No. 06-57 (Ct. Int'l Trade, April 25, 2006).*

- 17. **World Trade Organization (WTO) Consultations on the HMT**. In 1992 the European Community (EC, now European Union) members of the *General Agreement on Tariffs and Trade* (GATT) requested a "consultation" on the HMTF surplus through the Office of the U.S. Trade Representative (USTR). At that time the trust fund's surplus was about \$70 million. After those consultations occurred the EC did not pursue the matter, and no further formal action was taken under GATT.
- 18. **First EU Consultations.** On February 6, 1998, prior to the U.S. Supreme Court's *U.S. Shoe* decision, the EU requested World Trade Organization (WTO) consultations with the United States on the HMT's impact on EU imports into the United States. The EU claims that the HMT violates Articles I, II, III, VIII, and X of the General Agreement on Tariffs and Trade (1994). The EU estimates that the HMT costs European exporters \$86 million annually. On March 25, 1998 a first round of consultations took place, with the EU in Geneva, Switzerland, with Canada, Japan, and Norway also participating.

During these consultations the United States responded to factual questions posed by its trading partners regarding the HMT and how it is assessed and used, but declined to engage in a discussion of the international legal merits of the case or to speculate on how a U.S. Supreme Court decision might affect WTO obligations.

- 19. **Second EU Consultations.** On April 8, 1998, after the U.S. Supreme Court decision in *U.S. Shoe*, the EU requested a second round of consultations on the HMT. These consultations (which again included Japan, Canada, and Norway) were held on June 10, 1998. In these and other discussions with U.S. trading partners, the U.S. Trade Representative made it clear that any changes made to the HMT as a result of *U.S. Shoe* will be done to comply with the ruling of the U.S. Supreme Court and to maintain consistency with WTO obligations.
- 20. **Dispute Settlement Procedure.** Under WTO dispute settlement rules the EU could move to request establishment of a dispute settlement panel to examine its legal claims. The EU indicated that if satisfactory legislation was not passed by January 1, 2000, it would ask for a panel. No panel had been requested to date.
- 21. **Procedure to Remedy Violations.** If a WTO member nation is found to be in violation of WTO rules, it may be granted a "reasonable period of time" to correct the violation. Generally a member nation has a maximum of 15 months within which it must correct the violation or face trade retaliation. If the violating party fails to take such corrective action by the end of this 15 month period, any party having invoked the dispute settlement procedure may request authorization to suspend the application of concessions or other obligations under the WTO agreements with respect to the violating party.
- 22. **Proposed Replacement of the HMT and HMTF.** Subsequent to *U.S. Shoe* the Clinton Administration proposed replacing the HMT and HMTF with a Harbor Services User Fee (HSUF) and Harbor Services Fund (HSF). The proposed Harbor Services User Fee was aimed at satisfying the Supreme Court test for constitutionality by establishing a close link between the revenues collected and services provided to project users, while being consistent with the GATT and other U.S. international obligations. The Clinton Administration's HSUF/HSF proposal was transmitted to Congress on April 30, 1999, as H.R. 1947. The proposed bill was referred to the House Committee on Transportation and Infrastructure, Subcommittee on Water Resources and Environment. The subcommittee held a hearing on the bill on November 3, 1999. No subcommittee action was taken on the bill.

II. WATERBORNE COMMERCE

- 23. **Total Waterborne Commerce**. Federally maintained harbors and channels and associated non-Federal port and dock facilities are vital to the waterborne transportation of domestic and internationally traded goods, and are an essential contributor to the economic viability of the United States within the global marketplace. Total waterborne commerce in the U.S. in calendar year 2005 decreased 23 million tons (0.9 percent) from 2004 to 2.528 billion short tons (Table 1). Total waterborne commerce in calendar year 2004 equalled 2.551 billion short tons. The decrease in waterborne commerce tonnage between 2004 and 2005 was due to a decrease of six million tons in foreign waterborne commerce to 1.499 billion tons and a decrease of 13 million tons in domestic waterborne commerce to 1.029 billion tons.
- 24. **Foreign Waterborne Commerce.** In 2005 foreign waterborne commerce reached 1.499 billion tons (Table 1). Foreign waterborne commerce was valued at \$1.116 trillion, equivalent to approximately 9 percent of U.S. Gross Domestic Product. Foreign commerce in 2005 was comprised of 1.097 billion tons of imports (73 percent of total foreign tonnage) and 402 million tons of exports (27 percent of total foreign tonnage). Imports were valued at \$858.9 billion (77 percent of foreign cargo value) and exports were valued at \$256.6 billion (23 percent of foreign cargo value). Imports rose eight million tons (0.7 percent) in 2005 versus 2004 tonnage figures. Since the HMT was instituted in 1987, imports grew from 507.7 million tons to 1.097 billion tons, an increase of 116 percent. The value of imports increased more rapidly, up 221 percent from \$267.8 billion in 1988 to \$858.9 billion in 2005. Since the HMT was instituted in 1987, exports have increased by 8.5 percent, from 383.3 million tons in 1987 to 402 million tons in 2005, their highest level since 1997. The value of exports has increased by 93 percent, from a value of \$132.9 billion in 1988 to a value of \$256.6 billion in 2005.
- 25. **Domestic Waterborne Commerce.** In 2005 domestic waterborne commerce totaled 1.029 billion tons, a decrease of 1.7 percent from 2004. The 2005 tonnage was 8.3 percent less than the record level of domestic waterborne commerce of 1.122 billion tons recorded in 1990. Values of domestic waterborne commerce are not available.

Domestic traffic, excluding internal traffic, defined as cargo moving on the fuel taxed inland and intracoastal waterways, is generally subject to the HMT and comprises about 40 percent of total domestic traffic. This portion of domestic traffic declined 22.7 percent from 523.7 million tons in 1988 to 404.9 million tons in 2005 (Table 1). Coastwise traffic, defined as commerce moving between harbors on the Atlantic, Pacific, or Gulf Coasts beyond the inland and intracoastal waterways, has declined by one-third between 1987 and 2005, decreasing from 323.5 million tons in 1987 to 213.7 million tons in 2005. Lakewise traffic, defined as cargo moving between U.S. Great Lakes harbors, was 96.2 million tons in 2005, compared to 96.5 million tons in 1987. However, 2005 lakewise tonnage was 7.1 percent lower than the 2004 tonnage figure of 103.5 million tons, and one-quarter below the 1997 tonnage figure of 122.7 million tons. Intraport traffic has risen 10 percent from 82 million tons in 1987 to 90.2 million tons in 2005, and reached a post-1960s peak of 94.6 million tons in 2000. Intra-territory traffic was 4.9 million tons in 2005, compared to 4.7 million tons in 1987 and a record 7.3 million tons in 1996. Internal traffic, the largest component of domestic waterborne traffic with a 60 percent share, is generally not subject to the HMT. During the period from 1987 to 2005, internal traffic increased by 54.2 million tons (9.5 percent) from 569.8 million tons to 624 million tons.

Table 1
U.S. Waterborne Commerce Annual Tonnage by Traffic and Total Value of Exports and Imports
Calendar Years 1987 – 2005

(Tonnage in millions of short tons; value in millions of dollars)

2005	401.8	256,638	1,096.9	858,894	404.9	1,903.6

Source: Tonnage - U.S. Army Corps of Enginneers, Waterborne Commerce Statistics Center, *Waterborne Commerce of the United States*, Annual reports. Value - U.S. Department of Commerce, Bureau of the Census, *U.S. Waterborne Exports and General Imports* (1987 - 1999); U.S. Department of Transportation, Maritime Administration, *Waterborne Databanks* (2000 - 2002); U.S. Army Corps of Engineers, Waterborne Commerce Statistics Center (2003 - 2005).

Notes: The values associated with domestic waterborne commerce are not available. For the period 2000 to 2005, import and export tonnages include in-transit cargo. The values of import and export cargo do not include intransit cargo.

26. **States and Territories**. Forty-four states and territories recorded waterborne commerce in 2005, of which ten states handled over 100 million tons (Table 2). Texas led all states with 487.1 million tons of waterborne commerce followed by Louisiana with 456.7 million tons. Nine states and territories handled 50-99 million tons and thirteen others handled 25-49 million tons. Cargo tonnage assigned to each state is the summation of shipping (domestic and foreign), receiving (domestic and foreign), and intrastate traffic.

III. COLLECTIONS AND REVENUES

- 27. **Collections, Revenues, and Compliance.** All commerce subject to the HMT incurs the same 0.125 percent *ad valorem* tax. Historically, imports have provided the largest share of HMT revenue as they have led in both the total tonnage and value of cargo subject to the tax especially since the Supreme Court decision in *United States Shoe* eliminated the tax on exports (see Table 3). Imports tend to consist of higher value commodities (e.g., electronics, automobiles, etc.), while U.S. exports and domestic cargo has generally tended to be lower value bulk cargoes (e.g., grain, coal, chemicals, and petroleum products). Table 3 shows revenue paid into the HMTF since FY 1987, based on actual collections by source reported by the CBP.
- 28. **Source of Data**. Total HMT collections shown in Table 3 differ slightly from the "official" HMT deposits in Table 8 (shown in Section V. "Balances") because the Treasury Income Statement of the HMTF, like the Budget of the United States, must rely on collection and revenue estimates prepared weeks or months before the close of the fiscal year. The U.S. Department of the Treasury, Bureau of Financial Management Services (FMS) reconciles differences between actual fee receipts as reported by the CBP and its estimates on a monthly basis, as well as at the beginning of each fiscal year. Only the CBP reports collections revenue by source, as shown in Table 3.
- 29. **Recent Trends**. Total HMT collections increased from \$869.7 million in FY 2004 to \$1,047.9 million in FY 2005, an increase of \$178.2 million (17.0 percent) and to \$1,206.5 million in FY 2006, an increase of \$158.6 million (15.1 percent versus FY 2005). HMT collections in FY 2006 were the highest measured since the introduction of the HMT. Collections from every source except for taxes on exports increased year over year between FY 2005 and 2006.
- 30. Imports and Exports. The level of revenues collected based on imports reached a new record in FY 2006, with revenues reaching \$953.6 million, an increase of \$111.9 million (13.3 percent) between FY 2005 and FY 2006. Revenues collected based on imports represent approximately 80 percent of total HMTF revenues collected. The percentage of total revenues represented by imports has increased to 80 percent in recent years from their historical average of 60 percent, due to the elimination of the collection of HMT on export cargo in FY 1998. The annual valuation data of foreign waterborne commerce (displayed in Table 1 in Section II "Waterborne Commerce") is useful in interpreting overall trends in compliance with the HMT based on the ad valorem rate of 0.125 percent of cargo value in place since 1991. The HMT on imports is collected in conjunction with U.S. customs duties. Because the mechanism for administering, collecting, and enforcing customs fees is well established and well enforced, compliance within the import component of the HMT is high. Application of the current ad valorem rate of 0.125 percent to the Bureau of Census/Maritime Administration (MARAD)/Corps data on the total annual value of U.S. waterborne imports since 1991 (Table 1) provides a macro estimate of the potential upper ceiling for import collections. (The Census/MARAD/Corps data also include values for covered foreign trade zone (FTZ) cargo and exempt cargo and trade at ports in Alaska, Hawaii, and U.S. possessions not subject to the HMT). Actual HMT import receipts displayed in Table 3 represent approximately 90 percent of the potential ceiling for import and FTZ collections based on the Census/MARAD/Corps data, generally confirming a high level of compliance for imports. significantly lower level of HMT compliance was realized on export cargo during the years that the HMT was collected on exports. HMT receipts on exports generally represented less than 75 percent of the potential ceiling for export collections based on the Census/MARAD/Corps annual valuation data.

Table 3 Harbor Maintenance Tax Collections by Source, Fiscal Years 1987 - 2006

Source: U.S. Department of Homeland Security, Bureau of Customs and Border Protection, Office of Finance.

Note: HMT collections will differ from deposits into the HMTF due to reporting time and estimation procedures. Effective January 1, 1991, the HMT increase from 0.04% ad valorem to 0.125%. HMT collections on exports were halted on April 25, 1998. Negative amounts for exports in FY 1999 and 2000 reflect adjustments. Positive amounts for FYs 2001-2005 are adjustments to export revenues previously collected and miscoded.

- 31. **Foreign Trade Zone (FTZ)/Domestic.** In accordance with Section 683 of the North American Free Trade Agreement Implementation Act (P.L. 103-182) (107 Stat. 2057), funds were authorized for the administration and enforcement of the HMT. However, it was not until FY 1996 that monies were appropriated for this purpose. Much of the efforts by the CBP focused on addressing the foreign trade zone and domestic traffic, with the result that FTZ and domestic collections have increased significantly in recent years. In FY 2006 foreign trade zone collections totalled \$177.0 million, an increase of \$39 million (28.3 percent) from FY 2005. The FY 2006 FTZ collections were the highest level of collections ever recorded for this traffic. Domestic collections reached a record \$65.8 million in FY 2006, an increase of \$6.1 million (10.2 percent) over FY 2005. In the past ten years domestic collections have risen sharply from \$26.8 million to \$65.8 million (146 percent) despite an 18 percent decline in taxable traffic (domestic traffic less internal traffic) from 478.6 million tons in 1996 to 404.9 million tons in 2005.
- 32. **Passengers.** HMT collections associated with passenger traffic were \$10.1 million in FY 2006. The significant increase in collections on passengers beginning in FY 2001 (a year over year increase of 470 percent versus FY 2000) was the result of the Federal Circuit Court's January 5, 2000, decision in the case of *Carnival Cruise Lines and Princess Cruises*, *Inc. v. the United States* that the tax on passenger transportation is constitutional. The Supreme Court did not take the case; therefore, the circuit court decision stood, and the CBP began billing cruise lines for back payments.
- 33. Validation of Domestic Data. In light of the past variations in the level of domestic collections and concerns expressed by the WTO that the U.S. has not fully collected fees due from domestic shippers, ensuring full compliance on the domestic side is a priority. In addition to the administration and enforcement funding provided to the CBP for FYs 1996 2006, funding was made available to the Corps to work with the CBP to improve the collection and analysis of domestic receipts. The funding was used for development of a system to collect and validate shipper information required by the CBP for auditing domestic HMT collections. The goal of this effort is to increase the accuracy and completeness of domestic shipping information in order to improve the ability of the Federal government to verify the level of compliance.
- 34. **Improved Delineation of Foreign Vessel Movement**. The Corps has improved the accuracy of the delineation of ports where moves are subject to the HMT and the facilities contained in these ports. With the transfer of the U.S. Foreign Waterborne Transportation Statistics Program from the U.S. Census to the Corps on October 1, 1998, the Corps' Waterborne Commerce Statistic Center is now involved in identification of foreign cargo movements subject to the tax. The Corps is working with the CBP to improve the geographic accuracy of foreign vessel movements in U.S. ports, and has improved the computer programs that match the cargo to the vessel moves. As a result, both the domestic and foreign data are better suited for the CBP to use for verifying compliance.

IV. EXPENDITURES AND TRANSFERS

35. Expenditures for Corps O&M. Total Corps of Engineers expenditures eligible for recovery from the Harbor Maintenance Trust Fund in FY 2005 totalled \$716.4 million and in FY 2006 totalled \$705.1 million (see Table 4). Expenditures for Corps harbor and channel operation and maintenance expenditures eligible for recovery from the HMTF totaled \$708.6 million in FY 2005 and \$696.8 million in FY 2006. Eligible Dredged Material Disposal Facility (DMDF) costs derived from the Construction General account totaled \$7.8 million in FY 2005 and \$8.3 million in FY 2006.

The total navigation recoverable O&M expenditures in FY 2005 of \$708.6 million were due to a 11.9 percent jump in deep draft harbor navigation O&M costs (from \$568.2 million in FY 2004 to \$635.7 million in FY 2005) and a decline of 32.4 percent in shallow draft harbor navigation O&M costs (\$72.9 million in FY 2005 versus \$107.9 million in FY 2004). In FY 2006, deep draft harbor navigation O&M costs decreased by 4.2 percent to \$609.1 million.

After four consecutive years in excess of \$100 million (FY 2001 through FY 2004) expenditures on shallow draft harbors navigation O&M fell 32.4 percent to \$72.9 million in FY 2005. In FY 2006, shallow draft navigation O&M expenditures increased by 20.3 percent to \$87.7 million. Eligible shallow draft harbor navigation O&M costs in FY 2005 were lower than they might have been because appropriations language did not allow the HMTF to be used for inland harbor expenditures in FY 2005 (See below.). Normally recoverable inland harbor navigation O&M costs were \$6 million in FY 2005 (Appendix B).

Included in these totals are the O&M of DMDFs, projects financed from the Operation and Maintenance account for mitigation of shore damage due to Federal navigation projects, and O&M dredging of contaminated sediments. Mitigation of shore damage projects in the Great Lakes are funded under the O&M Appropriation in the Corps budget, and their O&M costs have been included in the harbor costs reimbursed by the HMTF. Their costs totaled less than a thousand dollars in both FY 2005 and FY 2006.

Legislative language in the annual Energy and Water Development Appropriations conference reports establishes guidance under which funds are permitted to be withdrawn from the HMTF to cover the Federal share of O&M costs for harbors and channels. The FY 2005 conference report language permitted funds to be used for coastal, but not inland harbors. The FY 2006 conference report language permitted funds to be used for both coastal and inland harbors. Neither conference report cited use of funds for Great Lakes harbors and channels.

The Great Lakes are generally recognized as the fourth coast of the United States. The HMT is collected based on cargo handled at Great Lakes ports. Their O&M costs were included among the U.S. harbors and channels whose O&M costs were generally intended to be defrayed by the HMTF. In addition, the traffic characteristics of Great Lakes harbors are comparable with coastal harbors, including:

- the importance of deep draft import and lakewise traffic at Great Lakes ports,
- the similarity of lakewise and coastwise traffic, and
- the significance of deep draft Great Lakes ports among all ports in the U.S.

Therefore, this HMTF Report construes the conference report language as including Great Lakes harbors with coastal harbors for funding from the HMTF.

Source: U.S. Army Corps of Engineers, Navigation Cost Recovery Database System. FY 1997 - 2006 results and historical record published in USACE, Institute for Water Resources report "Navigation Operation and Maintenance: Expenditures for Harbors and Waterways." Source of data for DMDF costs was U.S. Army Corps of Engineers Financial Management System, Status of Obligations and Expenditures Report for Construction, General, Appropriations. Amount for FY 2007 is preliminary and the amount for FY 2008 is an estimate based on the Presidents's Budget.

Note: The figures in the table have been adjusted to exclude expenditures for O&M for Mississippi River and Tributaries (MR&T) projects in years 1987-2002 and is therefore different from corresponding tables in previous reports. Annual O&M expenditures may differ from transfers from the HMTF in some years due to reporting time, post audit adjustments, and estimation procedures.

16

36. Maintenance Dredging. About four-fifths of the total harbor and channel O&M costs are attributed to maintenance dredging. Private industry conducts 80 percent of the maintenance dredging and comprises 84 percent of the costs for the work. The Corps conducts the remaining 20 percent of the maintenance dredging for 16 percent of the expenditures (Table 5). The costs for maintenance dredging by industry and the Corps has increased 132 percent from FY 1987 to FY 2006, while the quantity dredged in FY 2006 was 16.5 percent less than in FY 1987.

Table 5

37. **O&M Expenditures by State and Territory**. Corps harbor navigation O&M expenditures occurred in 35 states and territories in FY 2005 and in 40 states and territories in FY 2006 (Table 6). O&M expenditures for harbors in Louisiana far surpassed the amounts in other states, primarily due to the costs for dredging of the Mississippi River from Baton Rouge to the Gulf of Mexico. There were twelve states with harbor navigation O&M expenditures exceeding \$20 million in FY 2005 and eleven in FY 2006. An additional eight states in FY 2005 and seven states in FY 2006 had \$10-19 million in harbor navigation O&M costs. Five harbor projects in FY 2005 and four harbor projects in FY 2006 incurred expenditures of \$20 million or more.

Appendices B and C display the Corps harbor navigation O&M expenditures by region and state and territory and for individual harbor projects in FY 2005 and FY 2006. The costs in Appendices B and C are displayed in four tables: Tables 1D and 2D presents O&M costs for deep draft harbors (projects with

channel depths greater than 14 feet) and Tables 1S and 2S displays costs for shallow draft harbors (depths of 14 feet or less). Navigation recoverable costs include the navigation specific costs, any joint costs allocated to navigation, and, in the case of single purpose navigation projects, costs not assigned to any business function (unknown). Joint costs are those costs shared by two or more purposes. Harbor projects are assigned to the Coastal, Great Lakes, or Inland region if the Corps district in which they are located is in the Atlantic, Gulf of Mexico, or Pacific coastal region, the Great Lakes, or an inland area. A few states, such as New York and Louisiana, have harbors in two regions.

- 38. **Mississippi River and Tributaries Harbors.** There are five harbor projects connected to the Lower Mississippi River that are funded in the Mississippi River and Tributaries (MR&T) appropriations account, whereas all other harbors are funded in the Operation and Maintenance Appropriations. The MR&T harbors are Helena Harbor, Phillips County, AR; Baton Rouge Harbor (Devils Swamp), LA; Greenville Harbor, MS; Vicksburg Harbor, MS; and Memphis Harbor (McKeller Lake), TN. From FY 1987-2005 the navigation expenditures for the five MR&T harbors totaled \$35.7 million. After the close of FY 2004 the Corps discovered that enacted annual MR&T appropriations legislation through FY 2005 had not included language to recover the funds for MR&T harbor costs from the HMTF. To correct for this error the Corps is coordinating with the Department of the Treasury to reconcile transfers with adjusted estimates of costs eligible for recovery. Future reports to Congress on the status of the HMTF will reflect this adjustment.
- 39. Expenditures for Corps Construction of Dredged Material Disposal Facilities. Section 201 of the Water Resources Development Act of 1996 (P.L. 104-303) authorized the use of the HMTF for construction of DMDFs necessary for navigation O&M. In FY 1997 and FY 1998 construction costs for DMDFs necessary for navigation O&M were recovered from the Operation and Maintenance account and were included in harbor O&M costs in the annual reports to Congress for those fiscal years. Beginning in FY 1999 these costs were recovered from the Construction account. The Corps is reconciling costs incurred for DMDFs necessary for navigation O&M in FY 1999 through FY 2004 with amounts recovered for those years, and the reconciliations will be reflected in future reports to Congress for future fiscal years. Corps construction expenditures for DMDFs necessary for navigation O&M were \$7.8 million in FY 2005 and \$8.3 million in FY 2006, and they were incurred on three projects in both years.
- 40. Transfers. Transfers from the HMTF to the General Treasury for the U.S. Army Corps of Engineers, the St. Lawrence Seaway Development Corporation, and Customs and Border Protection, and administration costs increased from \$648.2 million in FY 2004 to \$706.0 million in FY 2005, and \$798.1 million in FY 2006, an increase of \$149.9 million (23.0 percent) over the two year period (Table 7). It should be noted that eligible expenditures by the Corps and amounts transferred by the U.S. Treasury from the Harbor Maintenance Trust Fund will be different in any given year due to lags in contract execution, carry over of appropriate funds across fiscal years, emergency supplemental appropriations, and the recording of transactions by the Treasury. Transfers to the Corps were 97 percent of net transfers in FY 2005 and 98 percent in FY 2006. Corps-related transfers did not equal eligible Corps O&M and construction expenditures. They were 98.5 percent of the amount eligible in FY 2005, but were 113.2 percent of the amount eligible in FY 2006. Prior to FY 1999, most transfers were for costs incurred in prior fiscal years. This was the normal procedure through FY 1996 but beginning with FY 1997, transfers were based on current year expenses. In Fiscal Year 1999, the Energy and Water Development Appropriations Act of FY 1999 (P.L. 105-245) did not provide for the recovery of Corps of Engineers O&M expenditures from the HMTF. However, the Omnibus Appropriations Act for FY 1999 included \$99.7 million for emergency O&M work in response to

tropical storms and hurricanes, and included language providing for recovery from the HMTF.

V. BALANCES

- 41. **History.** As discussed in paragraph 3, the current *ad valorem* tax rate of 0.125 took effect on January 1, 1991, making FY 1992 the first fiscal year in which the new rate was entirely in effect. Table 8 displays the history of the HMTF revenues, including HMT collections, toll receipts and interest; transfers to the various federal agencies for their activities and associated administrative expenses; and ending balances for the period from FY 1988 through FY 2006. HMT revenues have grown from \$161 million in FY 1988 to \$1,320.9 million in FY 2006. Transfers to federal agencies for activities and associated administrative expenses have grown from \$166 million in FY 1988 to \$798 million in FY 2005.
- 42. **Change in Balances.** The ending balance of the HMTF was \$ 3,305.7 million in FY 2006, an increase of \$939.4 million (39.7 percent) over an FY 2004 ending balance of \$ 2,366.3 million. The Trust Fund ending balance has grown from \$9.7 million in FY 1988 to \$3,305.7 million in FY 2006.
- 43. **Projections:** It is projected that the balance in the HMTF will grow from \$ 3,305.7 million at the end of FY 2006 to \$7,947 million at the end of FY 2011 (Table 9). Projections of revenues, transfers, and balances displayed in Table 9 assume no change in conditions affecting future collections and transfers.
- 44. **Comparison to Budget Projections**. The figures in Table 9 vary from those displayed in the President's FY 2008 Budget because the figures in the President's Budget are based on cash accounting, whereas Table 9 is based on final (although unaudited) accrual accounting, resulting in different calculations of interest income. The cash estimates for the President's Budget were developed in January 2007. The accrual estimates were prepared in October 2006.
- 45. **Summary.** Revenues substantially exceeded transfers in FY 2005 and FY 2006, as they have for a number of years. With no changes in the conditions affecting revenues or transfers, the balance in the HMTF is projected to continue to grow and to be sufficient to meet future demands. FY 2006 revenues exceeded \$1,321 million while transfers were \$798.1 million, leaving a fiscal year end balance of \$3,305.7 million. Amounts transferred from the HMTF depend upon the amounts appropriated by Congress for authorized activities, irrespective of the level of funds in the trust fund.

Note: Interest represents total interest accrued on interest bearing securities during the fiscal year, including interest from securities that matured in each FY and an estimate of interest accrued in that FY on longer-term investments (net of interest previously accrued). By comparison, the amounts actually deposited in the HMTF were \$53.7 in FY 2005 and \$130.4 in FY 2006.

GRAND TOTAL

Dollar amounts for projects are rounded in the table. Subtotals and totals are based on unrounded project amounts.

^{*}Corps of Engineers Project Work Identification number.
**Single Purpose Navigation, or Multipurpose with or without cost allocations.

^{***}That portion of project operation and maintenance costs recoverable from the HMTF.

APPENDIX B - TABLE 1S
